| PROFESSIONAL SUMMARY

Full-Stack Developer skilled in React, React Native, Node.js and PostgreSQL, MongoDB, building scalable and high performance applications with a focus on clean code and user experience.

| TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Tailwind CSS, JavaScript, TypeScript, HTML/CSS.
- **Backend:** Node.js, Express.js, RESTful APIs, GraphQL, Socket.io
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Security & Authentication:** JWT, OAuth, Session Management
- **Tools & Others:** Git/Github, AWS, Docker, Postman.

| EXPERIENCE

Full Stack Developer Intern

Digi-Lateral Solutions, Malad(W) | May-2025 - Present.

- Collaborating on full-stack applications using React, React Native, Tailwind CSS, Node.js, Express, MongoDB and MySQL.
- Building responsive, user-friendly interfaces and implementing backend APIs and database operations.
- Gaining hands-on experience with RESTful architecture, authentication, and component-based design.
- Working in a collaborative team environment following Agile development practices.

| PROJECTS

QR-Cedit-System:

React, Tailwind CSS, Node.js, MongoDB, Authorisation | Live Demo | GitHub

The **QR-Credit-System** is a MERN stack app for managing QR codes and credits in a user hierarchy. It features credit allocation and QR code generation linked to personalized doctor cards. The app includes transaction logs, expiry management, and image cropping. Built with **React**, **Node.js**, and **MongoDB**, it offers a responsive UI and robust credit control.

EchoWrites:

Next.js, React, PostgreSQL, Tailwind CSS, NextAuth, Dark Mode | Live Demo | GitHub

EchoWrites is a minimal, responsive blog platform for writing and publishing articles. Built with **Next.js** and styled using **Tailwind CSS**, it supports markdown-based content and features a smooth **dark mode** toggle. Designed to be clean, readable, and easily extendable for future functionality like tagging or **authentication**.

Task Manager:

React, Tailwind CSS, Node.js, MongoDB, Authorisation | Live Demo | GitHub

The **Task Manager** App is a MERN stack application enabling users to create, assign, view, filter, and update tasks with role-based access. It features secure user authentication, real-time toast notifications, and a clean, responsive UI built with React and Tailwind CSS. The backend uses Node.js, Express, MongoDB, JWT, and bcrypt for data management and security.

| EDUCATION

D.G. Ruparel Collage of Arts, Science & Commerce, Mahim – 400016.

BSc. Information Technology – [2023-2026]
